A collection of Computer Code cards and mini-booklets from M. Adelman via Paul Dickson. These have been scanned at the Lawshe Museum. These include the SALT, 1004, 1005, SS-80, 418 II, 418-III, 490, 490/491/492/494 Cobol, 491/492, 494, 1108, 1106/1108, 1110, and 9000.

The unusual UNIVAC SALT reference card UP-2455 Rev. 1 from 1962 seems to be for a 24-bit CPU.
