Send obits, etc. to [newsletter@vipclubmn.org](mailto:newsletter@vipclubmn.org). Activity coordinator emails on page 4.

**Why the VIP Club is Using Evite:** The VIP Club is now using Evite to notify VIP Club members with email addresses about near-term events. The VIP Club newsletter and website social page will continue to detail all our near-term and future events.

As of December 2019, the VIP Club had 750 active member units (MU) and 436 inactive MU. There are 639 MU and 281 inactive MU with e-mail addresses in our membership data base. Only 266 (8%) do not have email; therefore, using Evite is an efficient method to announce upcoming events to most of our members.

Evite recipients should RSVP with “Yes”, “Maybe” or “No”! Those replying with “Maybe” are asked to update their RSVP to Yes or No as soon as they are certain if they will be attending or not attending. RSVP comments are to be used to answer requests from the event coordinator, such as food choice and payment requirements. Another major benefit for invitees is that the Evite “Guests” button allows you to see who else is coming to an event.

Evite also sends a reminder of the event two days before the event. A response (Yes, No, or Maybe) is appreciated from all invitation recipients. The host monitors responses in real time to assist in event planning. Those with e-mail addresses who do not want to receive Evite’s can request to “opt out” by sending the request to [membership@vipclubmn.org](mailto:membership@vipclubmn.org).

To ensure that an Evite isn’t channeled to your “spam” folder, you can place the email address, [info@mailva.evite.com](mailto:info@mailva.evite.com), into your e-mail address book.

**No Email?** If you do not have email and have recycled your last newsletter issue, you could go to your local library to review upcoming events on a public PC, browse to <http://vipclubmn.org/Social.html>. Byline *Keith Behnke & Gish Devlaminck*.

## APRIL PROGRAM

### Volunteerism Recognition Luncheon

**Free Hot Buffet:** You Are Invited! The board will host a luncheon at Joseph’s in St. Paul on Wednesday April 8th for members who return the survey. Although the luncheon recognizes member services, just as important is a chance for giving and receiving insight on what’s available to do out there. Experts tell us that volunteering, while benefiting society, does improve one’s wellbeing; a win-win for both.

Whatever volunteering you’re doing makes our communities better and should be recognized. This year we are just requesting organization names and aren’t tabulating the hours. The greatest volunteer hours submitted in prior years was in the civic outreach area and in religion/church activities.

- 11:00 AM – 11:30 AM Check in, Nametags, Coffee, and Socializing – cash bar,
- 11:30 AM – 12:15 PM Enjoy a buffet luncheon,
- 12:15 PM – 12:45PM Program recognizing our volunteers and feedback about who does what, and
- 12:45 PM – 1:30 PM Last cup of coffee and a bit more socializing.

Your participation reservation is easy; just fill out and return the page six survey form or go on-line to <http://vipclubmn.org/Volunteer.html>. Even if you can’t come to this free lunch, we’d appreciate receiving your 2019 volunteerism survey form.

**Nominate** someone to receive the ‘Jansen’ Volunteer Extraordinaire award at the April luncheon; please send her/his name and your reason why before March 27<sup>th</sup> to [board@vipclubmn.org](mailto:board@vipclubmn.org). Previous recipients were Keith Myhre, 2015; Dick Lundgren, 2016; Don Weidenbach, 2017; Allan Douglass and Tom Turba, 2018; and Tricia Myhre, 2019.

Joseph’s is at 140 Wabasha St S 55107 in St. Paul. Google directions from your home to Joseph’s via the [volunteer page](#). By Board Associate *Frank King*

**MAY PROGRAMS**

**Register early to aid Coordinators**

**Roseville Good Old Days** at 10:30 AM on May 1<sup>st</sup>. This will be the 13<sup>th</sup> gathering of current UNISYS and former employees who worked in Roseville. If you didn't receive the 'save the date' announcement sent to 1,300 people in January; send an email to Coordinator [paul.dickson@comcast.net](mailto:paul.dickson@comcast.net). Byline *Paul Dickson*

**Syttende Mai** at 11 AM on May 15<sup>th</sup> at Casper's in Eagan. In 1974 six Sperry-UNIVAC employees gathered for lunch to celebrate Norwegian Constitution day; Ole Olson, Keith Myhre, Larry Bakken, Burt Gunderson, Gary Odegaard, and Joel Christensen. Current committee is Dale Torgerson, Dale Phelps, Dave Carter, and Dick Lundgren. Watch for April *Evites*.

**PRESIDENT'S MESSAGE**

2020 marks the 40th anniversary of the VIP club, and after 40 years, things are changing a bit.

First, we welcome our new newsletter Editor, Mary Beth Ruhland. As reported last issue, Lowell has decided to become more retired, and Mary Beth has taken on the role of Editor. She is a Lockheed retiree, worked in the publications area. Both her parents were also employees, and her father was a previous club board member. {Richard J. and Theresa Mullins – read his obit on page 3 of <http://vipclubmn.org/Newsletters/Enews1607.pdf>}.

Speaking of the newsletter, the Board would welcome any feedback you might have regarding newsletter content. What don't you particularly like, and what other areas might you like to see added. Do you have a burning desire to contribute any article of interest? Was there an important milestone you want to share? Call, write, or email any of the board members with your thoughts.

We also have an important date for you to save – the club will host a 40th anniversary party on the afternoon of September 15<sup>th</sup>, 2020 at the Royal Cliff event center in Eagan. More details and sign-up info to follow in the next newsletter but mark your calendars and spread the word.

The VIP club is also moving. Some of you may remember when there was a clubroom in the Shepard Road plant, and members could get a free lunch in the cafeteria. Well, both that plant and the free lunch are long gone, and our "home" has been a post office box in Roseville. As the club membership has gradually drifted to the south area (almost half of our members live in Dakota County alone), regular mail pick-up in Roseville is getting to be more of a challenge, so we are moving our PO box to Eagan. HOWEVER, the Roseville box is still active and will remain so for some time during the transition. You may keep using the Roseville address to send in your renewals and volunteer reservations for the FREE volunteer brunch on April 8<sup>th</sup> at Josephs. See you then.

*Harvey Taipale*, VIP Club President.

**SOCIAL REPORTS & ARTICLES**

**Golf League:** Check the website for league play start and 1<sup>st</sup> tournament, <https://ulglmn.org/umgl/>. Their site has scrolling photos from the 2019 banquet. About a hundred happy faces! Byline *LABenson*

**Unisys Tidbit #1:** Blue Bell is seeking artifact donations intending to set up an in-plant history museum, details will be forthcoming next issue.

**MATCALs Alumni Gathering:** A few of the MATCALs (Marine Air Traffic Control and Landing System) support group met for lunch in December.

Around the table from left to right are Gordy Erickson who put in more than 35 years with the company. He was the on-site program manager for MATCALs. Next is Carolyn Pleasant who worked more than 10 years as program librarian, Vern Sandusky with more than 25 years as Engineer in Charge and Ron Irwin with more than 30 years who was the manager of the programmers. All worked at the MATCALs Support Facility at Mare Island and will be remembered by many of the folks from St. Paul who traveled there to work during program development, system integration and testing. Submitted by *Vern Sandusky*

**Holiday Party/Dinner Re-cap** – The VIP Club had its annual Holiday Dinner Party on Sunday, January 5 at the Lost Spur event center. Forty-four club members registered, and the party started with a social hour with refreshments available at the cash bar.

We were then treated to an excellent meal after which we enjoyed an outstanding performance by the Eagan Men’s Chorus with an assortment of Holiday songs.

Conductor is Kathy Andrews. The Eagan Men’s Chorus began as the Sperryaires in the 60s.

Unfortunately, this year we were competing with the Vikings playoff game in New Orleans but luckily there was a TV behind the bar so we could follow what turned out to be an exciting victory. A photo collage by *Nick Benson* is on page 7. Byline *Keith Behnke*

**The 314<sup>th</sup> Meeting!** At the 2<sup>nd</sup> Wednesday breakfast on Dec. 11<sup>th</sup>, Emcee Marv Brown announced that he could no longer coordinate this function as his Dr. told him to slow down. When Marv retired from UNISYS, Roseville in 1987 (after the merger) he felt a need to keep connected with co-workers so started the Unisys Retiree Breakfast Group in 1991. Two years ago, the group cut back to quarterly breakfasts because of diminishing participation. Although the buffet cost has risen over the decades; attendees still revel in sharing ‘remember when’ stories. Marv has chronicled the history at <http://vipclubmn.org/Social.html#Unisys>. Thanks to Marv for 28-years of leadership! The next, 315<sup>th</sup> breakfast gathering will be on March 11<sup>th</sup>, now coordinated by *Paul Dickson*. Byline *LABenson*

**When My Time Comes?** The VIP Club Board received an email inquiry: "Do you know the name of a lawyer or retiree employee who understands the Unisys retirement benefits who could assist an employee when needed. I have a will and a law firm but the law firm is not familiar with the implementation of the details (transferring benefits to spouse.)"

Answer(s): 1) Board members are not qualified estate planners. 2) The board does not have a list of law firms nor ex-employees that have previously helped those whose spouses passed away nor who helped spouses when a member passed away. 3) The Board suggests that you and/or your spouse put together your questions then make a contact call to the number in the box below to get the answers you want. You could consider having your law firm or will executor be a part of such a call. A copy of your exit/retirement papers that established your pension and benefits would be helpful plus employee dates of service, etc.

<b>Retirement Status and Benefits:</b>	
Numbers to call if you or your heirs have death benefit or pension questions – you will need an SSN and a PIN.	
Unisys	1-877-864-7972

**Unisys Tidbit #2:** On February 6<sup>th</sup> SAIC announced purchase of UNISYS *Federal*, an operating unit. The effect of this buy on Eagan based Unisys and Eagan based Liedos will be explored in our next issue. *LAB*.

## LEGACY TIDBITS

**ERA Guys:** Thirteen video interviews are on-line, <http://vipclubmn.org/PeopleInterview.html#OldTimers>. Thanks to videographer John Westergren and file converter Keith Myhre. Posted by *Lowell Benson*.

**What's in our Legacy Anthology?** The table of contents is <http://vipclubmn.org/SiteMap.html#Level3>. The anthology theme is: People Engineered Computers and Systems at Locations in the Minnesota environs and through the world. Also, Our Stories and Exhibits chapters supplement the theme.

What isn't there? Chapters 35 and 36 are but placeholders as no one has written about Pueblo CO or Clearwater FL. Chapter 37 has but an 'Emmet Johnson' organization chart. AND, is your micro-bio included in the People chapters? Byline *LABenson*

**1230 (aka CP-642B modified)** - An Apollo tidbit: I was assigned to engineering for the initial checkout and was tasked by Don Mager with selling the first one to NASA. After that I supported qualification testing and final checkout in Plant 3 which was a common thing for Field Service troops to do when not traveling.

I did make one trip to Goddard Space Flight Center to check out an intermittent problem that was creating some problems between the hardware guys and the programmers. The only time I could get on the system was at night, so I ended up working 12 midnight to 7 in the morning. After spending 5 nights staring at a scope and varying the trigger levels, I got a look at what was happening. An interrupt (occurring asynchronously) had generated a voltage spike that, after passing through 4 levels of logic, had been expanded to a runt pulse which locked out the incoming interrupt request without having been queued/recognized for processing.

I found a signal to mask the runt pulse and allow the interrupt to be recognized during the next scan. There was an "and" gate available, so I wired in a change and started it up.

I then ran the system for two nights with no problems and the programmers did their day time testing with no problems so I put the change into the second 1230, declared victory and 'got out of Dodge.'

Bob Oulicky had been responsible for the I/O design which was largely a carryover from the CP-642B, and he never could understand what the problem was and how this change fixed it but it's hard to argue with success! 😊 Cheers, *Richard 'Dick' Erdrich*
